

Shaklee Basic-H2

Gardens

This formula is for general gardens with all types of vegetables.

Per 1/2 acre: Apply 125 lbs. Natural Mineral evenly in the garden with some type of compost.

Then use a garden hose attachment which is an Ortho Bottle from the hardware store. Fill this applicator bottle with:

8 oz. Liqui-Lea

12 oz. Basic H2

Spray evenly on 1/2 acre garden four times throughout growing season.

VEGETABLES:

Potatoes, carrots, etc.; NOT tomatoes

The soil should be conditioned with 1- 1/4 (16oz) Basic H2 with 10 gallons of water per acre. or 5/8 (16 oz) Basic H2 with 20 gallons of water per acre applied again after the crop is up.

STRAWBERRIES:

New ground: Do not use fall formula on any existing plants.

FALL: 1-1/4 (16 oz) Basic H2 with 20 gallons water per acres before crop is planted.

SPRING: Apply 5/8 (16 oz.) Basic H2 with 20 gallons water per acre immediately after planting.

For existing plants;

FALL: Apply 2/3 (16oz) Basic H2 with 20 gallons water per acre. Repeat in early spring and once in late spring.

TICS in EVERGREENS -

SMALL TREES

1/8 oz. Basic H

1 oz. Liqui-Lea

1 gallon of water

Feed at the base of the tree or spray it on.

Webb Worm

Mix 1- (16oz) Basic H

With 4 quarts of water.

Completely drench the tree with this mixture.

Let sit for 30-45 minutes. Then rinse down the tree with water. This will take care of hard to kill insects in orchards and lawn trees.

ORCHARDS

1/4 oz. Basic H2

1 gallon of water

Spray trees before blossoms appear. Spray every 9-10 days for best results. Spray right up until harvest.

SICK TREES

1 - 16 oz. bottle of Basic H2

5 quarts of water

Feed tree at base with 1 quart of mixture per day, for six days. This will take care of fungus and disease. Do not feed seedlings this mixture - spray with regular formula.

APPLE TREES

Feeding trees:

2-1/2- 16oz. Of Basic H2

80 gallons of water

Insect Control:

1/4 oz. Basic H2

1 gallon water

Spray every 9-10 days.

TOMATOES

When transplanting put 1 - 16oz. of Basic H2 with 20 gallons of water for set water. Then wait until the tomatoes take hold and are going well, apply 3/4 of 16 oz. Basic H2 plus 1 ounce of Liqui-Lea to 20 gallons of water per acre.

APPLE SCAB

1 quart of Basic G

100 gallons of water

Spray apples as you would Lime Sulfur.

Spray at pre-blossom and at petal fall, then every 15 days, for best results.

LAWN CARE

Buy an Ortho Bottle from a hardware store.

Fill this with 1/2 Basic H2 and 1/2 water and hook it to your hose. Continually spray your lawn, don't let it soak. Just go along the grass until the Basic H is gone. Fill again if necessary. Do this 4-5 times a year. Once in early spring (April would be a good time) and once in late summer.

GRUBS

12 oz. of Basic H2

8 oz. of Basic G

10-12 gallons of water

Spray every 100 feet.

Use Ortho bottle or injector.

DANDELIONS

100 square feet

Use Ortho sprayer or hose with valve system.

1 quart (32 oz) of Basic H2

1 bottle of Liqui-Lea

8 oz. of Basic G

Should be used with some type of liquid fertilizer. Apply twice a year.

TREES

LAWN CARE

SMALL SEEDLINGS OR SEED BEDS

Mix 1/2 oz. of Basic H2 with one gallon of water. Spray on the whole seedling and around the entire trunk. Apply once every ten days.

SMALL EVERGREENS

Add 1 oz. of Liqui-Lea to the above mixture in small seedlings for proper vitamin needs.

TREES: 3-4 FEET TALL

Mix 1 - 16oz. Of Basic H2 with 8 quarts of water. Then, of this mixture, feed at the base of the tree one cup of solution twice a day for the first day, then once each day until the mixture is gone.

Feedings are of mixed solution. Do this feeding three times a year.

TREES: 4-8 FEET TALL

Mix 1 - 16 oz bottle of Basic H with 6 quarts ** of water. Feed at the base of the tree. Use 1 pint (8 oz.) of the mixture, twice a day for 2 days and 1 pint (8 oz.) a day thereafter until the solution is gone. This must be done three times a year.

TREES: 8 FEET AND UP

Mix 1 - 16 oz. bottle of Basic H2 with 5 quarts of water. Feed one quart of the solution each day until the solution is gone. Do this twice a year.

EVERGREENS

Add 8 oz. of Liqui-Lea to the above mixture.

LAWN SHRUBS and BUSHES

For any type of evergreen shrub, use 1/2 tsp. of Basic H2 and 1 tsp. Liqui-Lea per gallon of water.

HARDWOOD SHRUBS &

SMALL TREES

Use 1/4 oz. Basic H2 with one gallon of water. Spray once every 2 weeks or if insects appear.

ROSEBUSHES

Use 1/2 tsp. Basic H2 per gallon water. Spray rose bushes to protect them from spiders and other insects and disease.

HOUSE PLANTS

For healthy plants use 2 drops of Basic H2 with quart of water. Water as needed.

Add 1/2 tsp. Liqui-Lea to each quart of water and watch them do better!

Cabbage Worms: Use 1/2 tsp. Basic H2 per pint (16 oz.) of water - once a week.

Tomatoes: Use 1/2 Tablespoon per gallon of water.
