

HEALTH CARE PROFESSIONALS SPEAK OUT:

FROM CHRISTOPHER SCOTT, M.D., Saskatoon:

"Supplements are absolutely crucial due to the quality of our soil and food today. There are a lot of different supplements available on the market, but labels do not accurately reflect contents. Over the past ten years I have been using SHAKLEE supplements for personal use, as well as confidently recommending them to my patients."

FROM LINDA RODRIQUEZ, M.D., Pediatrician

"For over 19 years SHAKLEE has been a blessing for me, my family, and my patients who have all benefited from scientifically proven products for quality health and healthy living. Our food today is so deficient in nutrients because of what we have done to it, it is no longer the same food that Mother Nature offered to us. For my fellow physicians who are looking into incorporating nutrition in their practice, I encourage you to consider using SHAKLEE's quality health products that you can trust and recommend with full confidence."

FROM KATHY WICKENS, Chiropractor, Perth, ON

"Patients get results with SHAKLEE! There is a definite difference in the holding patterns for chiropractic adjustments for patients taking SHAKLEE supplements."

FROM CHARLENE DAY, Registered Nutritional Consultant, Toronto, ON

"I have been in practice for over 26 years and have used many brands of supplements, including Professional brands. About 7 years ago, I was given information about the SHAKLEE Corporation. I was impressed when I read that over 80 research studies and articles about SHAKLEE products were published in prestigious nutritional and medical journals. Wanting the best for my clients, I started recommending SHAKLEE supplements. I was amazed at the results. My clients experienced a level of wellness far exceeding anything I had experienced in the previous 19 years."

FROM NEIL PAGETT, M.D., Internal Medicine

"Supplements make sense. You have to have good double-blind, peer-reviewed clinical studies in order to evaluate them. As a medical professional, that's the only thing I will listen to. Except for SHAKLEE, I am not aware of any company that does on-going, in depth studies. SHAKLEE is the only company I can professionally recommend."

FROM RICK MEDORA, Chiropractor, Kingston, ON

"The most trusted name in clinical science is SHAKLEE."

A Pharmacist tells why he takes SHAKLEE ~ and only SHAKLEE!

I thought you might be interested in this e-mail. I asked my friend, Harry Shurley, a pharmacist, why he took SHAKLEE vitamins when he could get others, as samples, for free. Here is his reply.....

---

Why do I take SHAKLEE vitamins? From a pharmacist's view you have to look at the clinical research that is done by SHAKLEE.

Mrs. Lindley and I are writing a book on prenatal nutrition -- not quite complete -- and we requested clinical studies from the makers of prenatal vitamins and NO major company (except SHAKLEE) could provide us with any studies!

Also, as you know, the SHAKLEE vitamins are natural as opposed to the synthetic prenatal vitamins available in drug stores. The makers of those prenatal vitamins stress the amount of folic acid in them, which is 1 mg. Because they have 1 mg of folic acid they have to be on prescription because folic acid can mask pernicious anemia, but if you look at the prenatal vitamins they have very few of the other vitamins and most leave out biotin completely.

It is funny that you ask me this question because a few weeks ago I had a nurse call in for some prenatal vitamins and I asked her what was the best prenatal vitamin and she said, I don't know. So I asked her how did they determine what brand of vitamin to give to the patients and she said, Whatever they can tolerate.

There are so many reasons why I take SHAKLEE over the vitamins I could get from pharmaceutical companies. I don't have time to explain all, but the main reason is because the SHAKLEE vitamins produce results!

Artificial Foods Are Not the Nutritional

Equivalent of the Real Foods They Replace

However--the labels often claim they are.

The picture below shows two rats from the same litter 6 weeks after birth.

The one on the left was raised on nothing but eggs from birth

while the one on the right was raised on nothing but Eggbeaters.

Do they look like they were raised on nutritionally equivalent foods?

Thanks to Dr. Stephen Chaney

Eggbeaters were advertised as having the taste and nutrition of farm fresh eggs. Although the comparison chart on the box showed there were more vitamins and minerals in the Eggbeaters than in real eggs, what conclusion do you draw”?

So, can synthetic vitamins really build health?

WE KNOW THE ANSWER IS “NO” But check all this out for yourself. See if your body can tell a difference with the SHAKLEE brand. And send this letter to the company producing your current vitamins. Dr. Bruce Miller has been sending this for almost 30 years, and has never gotten an adequate response from any other company but SHAKLEE: Please send me whatever scientific literature you have on your product. What I'm looking for are independent, scientific studies or articles published in peer reviewed journals. It is very important to me that I am using a product that is not only safe but effective. Thank you very much for your assistance. The response should be on THAT product, not just research on that nutrient in general.
