

VIVIX Benefits for Vision – Macular Degeneration

Complete Reversal of Macular Degeneration

April 2010 through October, 2012 In addition to the 8 customers I have using VIVIX who have halted their macular degeneration, I have one Shaklee Customer who has **Completely Reversed His Macular Degeneration**.

Roy (80 in **April, 2010**) had one Wet and one Dry eye. His Ophthalmologist had used every surgical intervention possible, but his eyesight continued to decline. He was **only able to read using a magnifying glass** when I met him.

Roy and his wife Mary (76 in 2010) learned about VIVIX from their Chiropractor - the same man who got rid of his Ulcerative Colitis (October Newsletter). Roy was especially interested in talking to me because he hoped that VIVIX might help him with his COPD. He asked me if I thought it could also help with his Vision, and I told him honestly that I did not have any idea if VIVIX had the power to improve Vision problems.

But I did tell him that I believed -- based on the experiences of my other customers -- that at the very least, **RX for a Healthier Life** products (*Vivix, Vitalizer, Nutriferon, and Cinch*) could improve his lung capacity. Roy and his wife had spent a lifetime together focused on healthy eating, organic farming and prevention. So Shaklee products were a perfect fit for them. (More about Roy's COPD in the next newsletter)

Roy took out the supplements prescribed by his ophthalmologist, and asked me to make sure he was taking the same quantities of each nutrient when he switched brands to Shaklee. That required me to add 2 Carotomax & 2 zinc to the “RX for Life Supplements”-(*Vitalizer, Nutriferon, Vivix, Shaklee 180 Protein mix*).

After 3.5 months using his new Shaklee Supplements Roy visited his ophthalmologist for his 4 month check-up. The Doctor looked up from his computer screen after he had tested Roy's eyes and exclaimed: **“Your vision has improved! What are you doing?!”** This Doctor had never seen vision improvement in a macular degeneration patient.

I stopped by for a quick visit the evening of 9-28-10 -- and there Roy was in his recliner, next to a sun filled window, reading a 600 page normal print book **without using any reading glasses!**

After 9 Months of Shaklee, on 12-12-10: To the astonishment of the ophthalmologist and the optician Roy was **able to read ALL the lines on the eye chart WITHOUT GLASSES.** His Doctor said that he had finally become a believer -- that at first he thought it was just a fluke and that Roy's sight would start deteriorating again. **As of 10-24-12, Roy continues to have 20/20 in one eye, and 20/30 in the other.**

Roy is not the only person we have using Shaklee who has completely reversed his macular degeneration. And the natural question people have for me is “WHY?” or “HOW??” I think the answer is simple. **It takes Vitamins, Minerals, Protein and Water to build a healthy cell.** In addition, the research has proven that **VIVIX repairs DNA at the Cellular level.** Dr. Steve Chaney has explained in his monthly newsletter that the macula of the eye responds very quickly to those kinds of repairs. The Vitalizer, NutriFeron and Cinch protein provide the nutrients to rebuild healthy cells

My 9 Customers with Macular Degeneration who are using only one Shaklee Product = VIVIX, consistently report one of two things:

1. Their eye sight has not deteriorated at all after using VIVIX for 4 months. They continue using 1 tsp a day, and their quarterly appointments continue to show no more loss of vision.
2. OR, their vision continues to slightly improve.
Their Eye Doctors are telling them to keep on doing what they are doing!

Gordon's Eyesight Improves

Gordon (87) is Roy's cousin who lives in Indiana. After he heard about all of Roy's health "miracles" he decided to try VIVIX. His wife thought it was a waste of money, but he continued taking it.

In his 12th month using VIVIX he was having trouble with his eyesight. His visit to the ophthalmologist showed him that the reason his vision was "off" was because his eyesight had IMPROVED! **He needed a weaker prescription!**

EYESIGHT IMPROVES: My sister has been using VIVIX for a couple of months. She is a wildlife artist & told me yesterday that she didn't need her reading glasses as much when she is painting up close in detail!

VISION Improvement from Judy Sheehy

On June 20 2007, I went to the ophthalmologist because I was having a problem seeing clearly out of my left eye. My doctor sent me to a specialist, Dr. Hessburg at the Henry Ford Eye Care Center.

On June 25, 2007 I was diagnosed with Epiretinal Membrane Macula Traction in the **left eye** --- the **vision was 20/200**. I did not have Macular Degeneration or Cataracts or Glaucoma. Instead, he told me that as we age the vitreous gel on the eye pulls away and we get floaters. Some of the cells create a thin film and in my case the film landed on the center vision of the macula. It is sometimes called a "macular pucker".

The Doctor said it would not get worse OR better. He did say they could do a surgical procedure, called vitrectomy and surgically peel the membrane. Unfortunately this procedure is not always successful. I decided against surgery and did my best to cope with blurred vision in the center of my left eye.

In **August, 2007**, when **Vitalizer** came out at the Shaklee Conference, I added it to my already huge list of Shaklee supplements. I also increased my OmegaGuard to 6/daily along with what I was getting in the Vitalizer.

- My next checkup was **1/08** and my sights had improved to **20/100**
- I saw him again on **5-20-08** and my left eye had improved to **20/70**
- **Then 8-8-08, I started using VIVIX .**
- I had a recheck on **10/02/08** and my **left eye had improved to 20/45 !!**

After just two months on VIVIX, my vision improvement astonished my doctor. He was so sure that there was an error in the test that he examined me several times to recheck his figures!

FYI: I went down 2 corrections in that eye and one in my right eye with my new glasses!

Pocket Growing on His Retina

As a result of my Chiropractor's recommendations and referral, his patient, Randy Stamey, started using VIVIX in January, 2011. Eleven months later (11-17-11) I met him at my Chiropractor's Office and Randy shared with me his good news. In the examination he had just last week, his doctor told him that the **pocket that had been growing on his retina had completely disappeared.** Randy was very pleased to let me also know that **he needed new glasses because his vision had improved!** *Debbie 11.19.11*
