

Shaklee News

Why Shaklee is so Important to us!

We would like to welcome all of the new members into our Shaklee Family

We would like to thank all of you that have hosted a meeting this summer.

Some of you know Heidi and my story. We have eight wonderful children and one of those little darlings, Catherine was diagnosed with Retts Syndrome.

To understand Retts I will tell you some of the key parts of this syndrome.

First it is God's gift to those families that have one of these girls (it only affects girls), it is non hereditary and is a defect on the Mecp 2 protein.

The symptoms are: Seizuring 15-20 times a day (80% of the girls), constipation, their in the bottom 10% of hand, head, and feet size. Many of these children do not walk. Scoliosis is very common before age five,

they are non verbal and all of these girls have some kind of regretion by age five.

I can not say enough good things about my wife! When we found out that Catherine had Retts our Doctor told Heidi that she would be dead by the time she was 15 years old. Heidi, went on a mission from that point and started researching first what is Retts, then what can we do to stop the regression faze of the disease. By the way Heidi let the Doctor have it when we found out that many of these kids live long lives.

We are in two National studies, the first is at John Hopkins, the

second is Alabama Birmingham.

What Catherine's condition has done is forced us to challenge our belief if Shaklee is the best company out there or is there something better?

We have researched every company that has been brought to our attention and have found nothing that can compare to Shaklee in quality and research.

Catherine will attest to this with her phenomenal results.

Catherine's mutation is at 328 on this MECP2 protein and a sever case goes from 1-320. This being said we should have a child that is in a wheel chair and tube fed.

Shaklee Leads Industry by Removing All Parabens From Personal Care Products STARTING NEXT MONTH

We have great news for you and your efforts to market Shaklee personal care products!

Recently, there has been a lot of consumer focus on personal care products that contain parabens — effective preservatives that have long been used to protect consumers from microbial contamination in personal care products during storage and use.

Though there's never been solid science supporting a safety concern, questions we hear from you indicate

that a growing number of consumers prefer personal care products without parabens.

As a result, Shaklee has rigorously researched a safe and effective alternative to these preservatives and begun removing them from our personal care and cosmetic products.

You can look for the first of our personal care products that have been reformulated to be paraben-free - from our

Enfuselle® skincare line - in August 2008, followed by products in our Minerelles® Color Cosmetic line in September 2008. The remainder of our personal care products will be paraben-free beginning fall/winter 2008.

Look for more information, including new item codes, regarding the phase in of these products in the 7/24 *Shaklee Business Weekly*.

Shaklee can be used on yours pets also

Amongst the many animals that we have in our home are two guinea pigs, Charm and Miss Malagon. Miss Malagon developed a tumor that was sticking outside of the ear about an inch. I told the kids that I was not going to bring a \$15 dollar guinea pig to the vet but told them that they could use Shaklee

on it if they wanted.

So my kids started on the science project to cure Miss Malagon the guinea pig. They gave it the following ½ tsp of liquid lea, 1 tsp of protein, 1 crushed up nutritiferon, 1 crushed up Vita C Sustained Release, and 1 Tbls of water. This went on

for 3 to 4 weeks and we noticed the tumor slowly going away.

This was three months ago and I would like to say that Miss Malagon is doing extremely well today.

Cholesterol Success

I'm a believer now! Here's my story... My wife has used Shaklee products for years. She would get me started on a program, but I never stuck with it. Well, at my annual checkup, my cholesterol was pretty high: cholesterol-315, triglycerides- 299 and HDL-53.

When I came home with those results, my wife asked me to try just three Shaklee products. Since I was to have another blood test in five weeks, she asked me if I'd be faithful. If the test did not show a difference, I could quit. I agreed! The

next day I started taking 2 tsp Fiber Plan, 4 Omega Guard and 2 Garlic. Five weeks later, I took the second blood test. When I went to see my doctor she asked, "What have you been doing? Look at these new numbers!" My cholesterol was 239, triglycerides were 100 and HDL was 63. I'm continuing the products and positively anticipating my next blood test! Ken Pemberton

Blood Pressure /Cholesterol/diabetes

Three months ago I was diagnosed with high blood

*pressure, high cholesterol and type 2 diabetes. At 79, that wasn't good news. My doctor gave me several prescriptions to fill. Instead of calling the pharmacy, I called my daughter who just started a Shaklee business. She suggested Vitalizer, Soy Protein, Alfalfa and Glucose Regulation. **After using these for only one month, all my blood readings were Normal!** I'm excited I can handle these health challenges with Shaklee and avoid the bad side effects of medicine! Francis McGuire*

Insect Repellant

Burn Relief

I stopped to help a stranded motorist. Not realizing the radiator cap had been loosened, I gave it a slight tug and it exploded pouring boiling liquid over 60% of my right arm. I had no insurance at the time but had heard Basic H could help with burns. Misting the 2nd degree

burned areas with diluted Basic H was the only thing that gave me any relief. As the skin peeled and healed, I continued the Basic H treatments. The healing was quick and complete. To look at my arm now, there's scarcely even a scar. Jack Peskuski

Our next issue will contain all the information about Vivix. This new product is 10x more powerful than reseravatral by itself!

I use Basic H2 to protect myself from biting insects, mosquitoes, chiggers, no see ums, etc. Whether I'm in the yard or playing golf, I'm wearing Basic H2. If I happen to be unprotected, applying H2 to a bite works like magic to eliminate the itch. It works especially well on hornet stings. Dan Montevalvo

Catherine's Story Continued

Catherine. Catherine takes the

Catherine is a healthy seven year old right now and ranks for her age against all children of her age in the following:

Weight 87%

Height 77%

BMI 85.6% this is

unheard of in Retts.

In hands, head and feet size she is above 80% usually these appendages are cold to the touch. Catherine's are always warm. The doctors are puzzled that this does not happen with a Retts child. Catherine has not gone through a regression part of Retts. She shows no signs of Scoliosis and is able to walk up stairs and ride a bike without being strapped in. Doctor Percy who has seen 400 of the 600 known

cases in the United States says she is at the top as far as what she can do. He still does not understand this do to where Catherine's mutation is located. We do give Catherine a lot of food supplementation. But when you weigh the choices of everything that Catherine should be and is not what a small price to pay! After our six month follow up in Chicago (Alabama Birmingham Study) Doctor Percy who runs the Study said Catherine was the only Retts child to increase in her size rank from one check up to the next. All of these children decrease in rank as time goes on.

Doctor Rodriquez is a pediatrics child nutritionist that set up a program for

following on a daily basis and we divide it up during each of her meals.

2 GLA, 4 Vita Lea, 2 Herb Lax, 1 Nutriferon, 6 Lecithin, 4 Vita C 500mg, 2 zinc, 2 acuity, 2 flavomax, 4 Osteo Matrix, 1 Caratamax, 2 B Complex, 4 Omega Guard, 2 Garlic, 2 Vita Lea, and 8 Alfalfa.

If this seems like a lot think of the consequences? **I should also tell you that Catherine had 72 food allergies when she was 4. Today she is allergic to nothing.** By building up your immune system your body counters those things that you were previously allergic to.

This is why Heidi and I have been sharing Shaklee with so many people, to help everyone live a healthier life!

Still Not Convinced?

In Time Life's "The Greatest Adventures of all Time"

published by Time Inc. Home Entertainment, contains 25 inspiring adventures of exploration and record breaking accomplishments. Shaklee was involved in seven of the twenty five. Here they are in order:

1986 – Voyager non-stop around the world flight. 1988 – The Daedalus Project

Shaklee's Performance Drink was developed as the sole "fuel" for the Greek Olympic cyclist, Kanellos Kanellopoulos, who provided the pedal power for the human powered flight from Crete to the Greek mainland a total distance of 72 miles without stopping!

Mount Everest Expedition – The 1st American to scale the mountain without supplemental oxygen.

Polar Expeditions: North Pole Expedition –

1986 Will Steger history making expedition by dog sled which

made it to the North Pole without being resupplied.

Trans Antarctica Expedition – 1989-90 Will Steger led a team of men on a 3,741 mile dogsled expedition across Antarctica. This was the first unmechanized traverse of Antarctica.

International Arctic Project - 1995 this was the first official dietary study of arctic explorers who were supported by Shaklee nutrition. In this dogsled expedition, Will Steger's team was the first to cross the Arctic from Russia to Canada via the North Pole in a single season. This was a 3 month, 1,000 mile trip.

Jacques Cousteau – Cousteau Society: Cousteau chose Shaklee's safe, biodegradable, non toxic, effective cleaning products for his high tech research vessels, Calypso and Alcyone, to ensure that no harm would be done to the environment he so loved. **Over 50 Gold Medalist, the last three Olympics.**

Annika Sorenstam, was on Shaklee, when she won 13 out of the 25 events. She is still on Shaklee.

Environmental Responsibility 1990 Family Circle mag.

"**Green Chip**" award as one to the nation's ten most environmentally conscious companies.

Earth Day 2000 Environmental Business Leadership Award in recognition of the company's track record of environmental responsibility.

The nation's first Climate Neutral Certified Company in 2000 repeated in 2001 and currently still certified. This is the result of achieving a net zero impact on global warming by completely offsetting greenhouse gas emissions.

In 2006, Shaklee launches environmental campaign "A million trees. A million dreams."

What are some questions that you should ask of any company?

Do your homework, become educated, prove it to yourself? Try this, mail the following sample of questions to your current supplement supplier and or any companies you may be interested in. See what type of response you receive. A reputable and credible company should be willing and able to answer any and all questions you have.

1. How much has been spent of scientific (not marketing) research to date?
2. How long has the company been in business?
3. How many full time research staff does the company employ?
4. Do independent research scientists evaluate new product concepts? If so, who?
5. Does the company have a medical advisory board? If so, who is on it?
6. Do all product label claims have proven and documented substantiation?
7. **Has disintegration time of nutritional supplements been tested? Are all nutrients proven bio available to the cells?**
8. What colors, flavors, preservatives or fillers does your product contain?
9. Is the product whole food sourced?
10. Are ingredients organically and non- GMO sourced?
11. Are products processed using high heat? Do they have proven enzymatic activity?
12. What quality controls are placed on raw materials?
13. What quality controls are in place for product stability during the manufacturing process (ex. Temperature and humidity)?
14. What quality assurance tests are run throughout the manufacturing process?
15. Is clinical testing done on the finished product?
16. Is a 100% money back guarantee offered on your product?
17. Please send a complete bibliography of all research that has been accepted for publication in refereed or peer reviewed professional journals. Is the published research done by scientists employed by your company or those on your advisory board? Is it done on the specific products being manufactured by your company?

This list was taken from the book "Why do I Feel This Way?" third edition.

Conference calls

The phone number for the conference call is (712-432-1699. The participant access code is 766232#.

The conference calls all start at 9:00 A.M. Central Standard time.

- August 9 no conference call
- 16- Recap of New Orleans
- 23- Skin Care
- 30- Building your network
- Sept 6 Arthritis
- 13- Cold Season
- 20- diabetes
- 27- Heart disease

Shaklee wins PTPA Seal of Approval

Shaklee Corporation is the proud recipient of PTPA (Parent Tested Parent Approved) Media Inc's Seal of Approval for excellence in parenting products.
